

# Build a wheel with the days of the week

## Instructions

To build this wheel that marks the days of the week as well as the relation between today, yesterday and tomorrow you need paper, a colour printer, scissors, cardboard, glue and a split pin.

1. Print the two wheels and cut the blue and the green circles.
2. Cut two circles out of cardboard the size of the two wheels.
3. Glue the paper cutouts to the cardboard and let dry.
4. Place the smaller circle (green) on top of the large circle (blue).
5. Join the two circles with a split pin. Make sure the green wheel can easily rotate over the blue.
